Welcome to the November 2012 edition of the Radio HF Internet Newsletter. Well, this may be our latest Newsletter edition ever! Where does the time go? This time, however, I have a really good excuse and it is pretty exciting news as well.

Believe it or now, I am now a morning show radio DJ. Yes, that right. I am co-hosting a new morning show on radio station CKKI-FM 89.9 MHz. in the Mohawk Native reserve of Kahnawake, Quebec, southwest of Montreal. The station is a fairly new station in the Montreal region featuring country music, both classic and new country, 24 hours a day, 7 days a week. The station actually uses slogan call letters of KKIC which stands for Kahnawake Keeps It Country. The station, until two weeks ago, was automated with just a couple of hours a week of live programming. I was invited to the station to look at ways to raise the profile of the station and drum up some advertising for them as well. One of the first things we needed to do was to get some live people on the air. So we put together a morning show and a drive-home show, Monday to Friday. I am co-hosting the morning show called The Country Breakfast Show with Brian and Sheldon with one of the station owners, Brian Moon. We're on each weekday from 6 to 9 am Eastern (1100 to 1400 UTC). You can check us out through the station's website as well at www.kkicradio.com The webpage needs a lot of work but, right now, it is basically just a tool to provide on-line access to those people in our region who cannot pick up the signal on their radios.
So now you know why this edition is so late. Getting used to the 4 am wake-up call each morning has taken some getting used to. The afternoon show is on from 3 to 6 pm weekdays (2000 to 2300 UTC) and is hosted by Cedrick Periard. It's a lot of fun, and the reaction so far has been very, very positive. Hopefully you can tune us in and tell us what you think.

Our Monthly Special Zone for November features information on World Television Day and U.S. Thanksgiving.

This month's virtual voyage around the world, in the "Where in the World Zone", takes us to Israel. Officially the State of Israel, it is a parliamentary republic in the Middle East, on the southeastern shore of the Mediterranean Sea. It is bordered by Lebanon in the north, Syria in the northeast, Jordan and the Israeli-occupied West Bank in the east, Egypt and the Gaza Strip in the southwest, and the Gulf of Aqaba in the south.

We're closing in on the end of another year. Next month's edition will have our usual Christmas and New Years content. If you have any sites you enjoy from this time of the year, please send them along to us. It seems that my little rant last month about the lack of contributions seems to have produced some response this month with several contributors stepping up this month.

THE COMMENTS ZONE

Jerry Proc, Toronto, Ontario: Everyone likes the newsletter as long as *you* produce it and everyone else goes along for the free ride. Maybe the answer is to make part of the newsletter length or content commensurate with submissions. It is free after all, so no one has a right to complain it's too short if they don't contribute. If no contributors next month, maybe you can state that the newsletter will be shortened proportionately.

Brian Jeffrey, Carp, Ontario: The fact that you may be getting a contribution to your well received newsletter will probably send you into cardiac arrest. I suspect that one of the reasons more people don't contribute is they are not sure that a) the site will not be of general interest, b) it may have already been featured, or c) a failure to act on good intention. I know that I've suffered from all three but finally got the lead out of my bottom and found a couple of sites that may be of interest. I hope this helps somewhat. You are to be admired for your patience towards non-contributors. Hopefully your recent "rant" will break some of us loose. Providing 2-3 contribution a year is a fair price for receiving your newsletter. I see it as the cost of the subscription and I'll do my best to pay up from time to time.

THE CONTRIBUTORS ZONE

Thank you to this month's five contributors. It's great to see a few of you stepping up to the plate after several months of very sparse contributions. Keep it up. Take a few minutes and consider sending along a few of your favourite sites that you think might be of interest to other Newsletter readers.

THE RADIO ZONE

CANADIAN BROADCAST SALES

http://www.radiocbs.com/

VIA Sheldon Harvey, Greenfield Park, Quebec

Radiocbs.com, the website of Canadian Broadcast Sales, has been significantly upgraded to produce Canada's most comprehensive source for information on radio. The site serves as an industry information source, a research library and a sales resource. It contains market analyses such as competitive landscapes, demographic market positioning charts for all stations and general market overviews in addition to housing all CBS client radio station information.

HAM RADIO NATION

http://www.hamradionation.com/home.php

VIA Sheldon Harvey, Greenfield Park, Quebec

A place where you can find other users that all share a common interest Amateur Radio. Invite your friends, find new friends or find some of your past contacts. You can upload pictures of your radios and shack if you like or just check out others shacks, share your logs and contacts with others and compare your DX contacts and a lot more.

COMMUNICATIONS MUSEUM RAY ROBINSON

http://www.shlrc.mq.edu.au/~robinson/museum/

VIA Brian Jeffrey, Carp, Ontario

This is list of electronic equipment that Ray Robinson of North Ryde, Australia has restored to working order. The equipment is special because it uses valves in its operation. It is all obsolete and most of the manufacturers have gone out of business or amalgamated under different names. However, their equipment still lives. Robinson has endeavoured to replace any faulty component with the correct vintage, to keep them as original as possible, but sometimes the parts are difficult to procure.

KURRAJONG RADIO MUSEUM

VIA Brian Jeffrey, Carp, Ontario

Welcome to the web site for the Kurrajong Radio Museum located about 50km to the north west of Sydney, Australia. This site gives information about the museum and provides details of many individual radios for collectors.

KLAUS-PETER JUNG, DH4PY RADIO COLLECTION

http://www.kpjung.de/e_ego.htm

VIA Brian Jeffrey, Carp, Ontario

This is an impressive collection of radios of all sorts, particularly military equipment from different eras.

RADIO H.F. BOOK REVIEW ZONE

EDITOR: T. J. "Skip" Arey

The 2013 ARRL Handbook For Radio Communications
90th Edition
ISBN: 978-0-87259-405-0
Published by The American Radio Relay League
Hardcover Edition $59.95 Canadian or US
ARRL Order # 4197
Softcover Edition $49.95 Canadian or US
ARRL Order # 4050
hq@...

Yes, it's that time of year again. While our SWL friends reading The Messenger start looking for the new edition of the WRTVH, those of us who enjoy ham radio are ordering the latest edition of "The Handbook". My first was the 52nd edition back in 1975, a year before I got my Novice License. Thirty-eight books later and I still get giddy when I first crack the covers of the current edition.
This newest edition is sure to please. As many of you know, for quite a few years now, The League has included a CD-ROM in the back of The Handbook. In the earlier years of this practice, the disk was little more than a digital copy of the book and maybe a few formulae. This has changed significantly. The CD-ROM is now and essential tool loaded with value added features and information that expands upon the already exhaustive information you can find in the pages of The Handbook.
Picking out just a few of the new things to look at, I know I'll be running down to my basement to build the "Pebble Crusher" QRP Transmitter and I certainly will be trying out some of the new antenna designs added to this edition.
While I lean toward the construction sections, I would be remiss if I did not point out the expanded Power Supply theory section. This section now includes polarity protection circuit information that will keep any ham's gear safe from harm.
I've said it before and I'll keep saying it. If you can only afford to buy one radio book a year, it MUST be this one! Most highly recommended!

THE GENERAL ZONE

GREENWICH MEAN TIME

http://wwp.greenwichmeantime.com/index.htm

VIA Sheldon Harvey, Greenfield Park, Quebec

Greenwich Mean Time (GMT) was established in 1884 at the International Meridian Conference, when it was decided to place the Prime Meridian at Greenwich, England. This site is about one thingtime! Use it to convert time to different time zones; to get the accurate time; and other time related information.

FROM THE TOP OF THE WORLD

https://www.youtube.com/watch?v=XKsAsb87U1w&feature=player_embedded

VIA Jerry Proc, Toronto, Ontario

CHEX Peterborough, Ontario Television's Michelle Ferreri and Kevin Wheeler traveled to "the top of the world" to visit Canadian Forces Base Alert where they met some of the men and women who live and work there, and tour the facilities. Here is the feature report they produced.

This site features historical and technical information about crypto machines, cryptology and free software simulations

RADIO H.F. PUBLICITY ZONE #3

What is new in books & publications from the American Radio Relay League, the Radio Society of Great Britain, and other publishers?

ARRL Handbook (2013 Hardcover Edition) 90th Edition
The ARRL Handbook for Radio Communications is widely recognized as being the standard reference among radio amateurs and other technologistsexperimenters, engineers and students. The fields of radio and electronics are constantly evolving, and no other publication provides as accurate a snapshot of the state of the art as The ARRL Handbook.
Dozens of contributing experts and technical editors have helped fill these pages with essential information from across the expanse of radio communication fundamentals and practical applications. Clear and thorough explanations cover nearly every aspect of radio and antenna design, equipment construction, and station assembly.
A lot has changed since the The Handbook was first published in 1926. But just as was said of the ninth edition can be said of this 90th edition: Anyone who is at all interested in the technical side of radio can't afford to be without The Radio Amateur's Handbook.
CD-ROM Included! The CD-ROM includes all of the fully searchable text and illustrations in the printed book, as well as expanded supplemental content, software, PC board templates and other support files.
Product Details

Publisher: The American Radio Relay League, Inc.; Tenth Edition/First Printing (October 2012)
ISBN: 978-0-87259-596-5 Order #5965
Price: $29.95 Canadian or U.S.
Shipping early October!

Amateur Radio Public Service Handbook
Amateur Radio has consistently been the most reliable means of communications when other systems have failed. Hams work closely with disaster relief agency officials from FEMA, the American Red Cross, the Salvation Army, and other response organizations to offer wireless communications aid. From wildfires and earthquakes to marathons and road races, when getting the message through is critical, ham radio works.
The Amateur Radio Public Service Handbook is for all hams that volunteer their time and skill to serve their communities. It provides knowledge needed for communicating quickly and effectively during disasters, emergencies, and community events, as well as an opportunity to learn more about the Amateur Radio Service and its unique role in supporting the public.
Includes:
The ARRL & ARES
Served Agencies
Training and Readiness
Nets and the National Traffic System
The Response
Public Service
Digital Modes
Other Relevant Organizations
...and more!

Antenna Modeling for Beginners
By Ward Silver, N0AX
Over the last decade, computerized antenna modeling has advanced greatly with inexpensive and even free modeling software now available. Modeling, a powerful tool in Amateur Radio, can help you design antennas and optimize their performance.
Antenna Modeling for Beginners is an introductory guide to using modeling software for

designing and evaluating antennas. It provides a detailed introduction to EZNEC, the most popular antenna modeling program used by radio amateurs today. With this book, you'll set up basic modeling software, evaluate and adjust pre-designed models, and create your own models. Step-by-step exercises and explanations will familiarize you with important functions and procedures along the way. As you progress, you'll discover antenna modeling is simple to learn and use!
Product Details
Softcover: 176 pages.

Shipping mid-October!

The Care and Feeding of Transmission Lines
By Joel R. Hallas, W1ZR
Transmission lines are an integral part of the art of radio. Designed to carry RF power over short to medium distances with minimal loss, properly selected and installed transmission lines can be as important as radio equipment and antennas for a station's success.
The Care and Feeding of Transmission Lines is a radio amateur's guide to understanding transmission lines. It includes an introduction to the various types of transmission lines, key parameters of coaxial cable and balanced line types, as well as the different types of connectors. With this book, you'll learn how to select the most appropriate transmission line for an application, how to install it, and maintenance techniques to help extend the useful life of the line.
Product Details
Softcover: 112 pages
Publisher: The American Radio Relay League, Inc.; First Edition/First Printing (September 2012)
